VR Data Transformer

Model Name : VRD-1000

Vagle

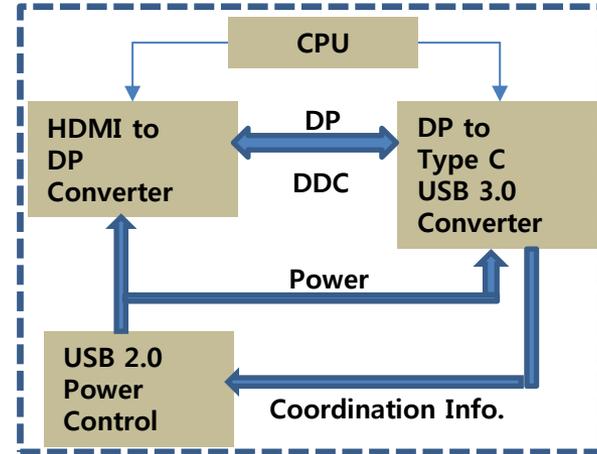

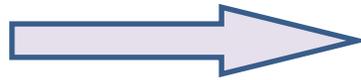

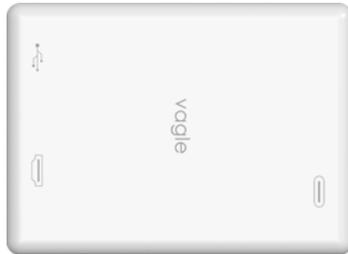

# VR Data Transfomer

Easy access to your PC for enjoying VR contents with LG 360 VR.

Play & Enjoy any VR contents from ON/OFF-LINE on your PC.

# What does "vagle (VRD-1000)" do for you?

- VR content software (called "VR Player") in your PC makes video data with output resolution of 1440x960 with HDMI signal.
- "vagle (VRD-1000)" receives coordination value information data through USB2.0 from VR HMD Tool and edit the video data into VR HMD Tool as HDMI output signal.

# Explore the world beyond ~!!!

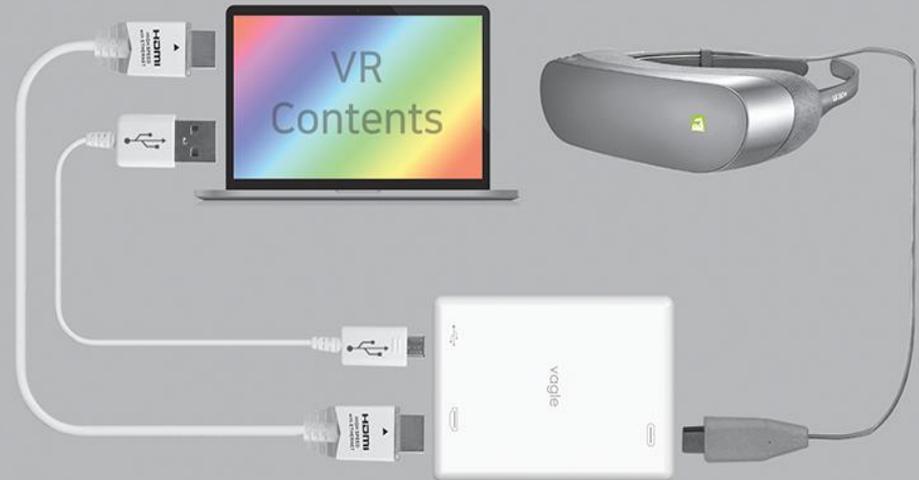

## Key Features

- ✓ **Transferring** VR video data from PC through HDMI to LG 360 VR or to any other VR Glasses that have Type C USB 3.0 connector.
- ✓ VR video & audio data **converting** from PC through HDMI 1.4 and USB 3.0 Type C to LG 360 VR or to any other VR Glasses that have Type C USB 3.0 connector.
- ✓ **Read & Transfer coordinates value** information from LG 360 VR or to any other VR Glasses that have Type C USB 3.0 connector to PC through USB 2.0 and USB 3.0 Type C.

## How to use it easy

- Connect a HDMI cable to your laptop or desktop.
  - Connect the USB type C Digital AV multiport output plug in the VRD-1000 to the USB Type C cable connected to the LG 360 VR.
  - If you connect the USB 2.0 cable, it will automatically recognize the support resolution and output the best image to fit in the LG 360 VR.
  - Run the VR Player and play the contents you want.
- \* When the player does not work well at the first connection, reconnect the USB 2.0 cable or USB Type C cable.
